Stop doing it by hand.

Rewire AI builds AI that handles your team's repeat work: **enquiries, phone calls, data entry, quotes and follow-ups.** It runs on its own, inside the tools you already use.

SOUND FAMILIAR?

- × Enquiries sit in WhatsApp and the inbox for hours.
- × Calls go unanswered after hours.
- × Staff type the same details in twice.
- × Quotes and follow-ups slip through the cracks.
- × Someone has to chase every late payment.
- × The weekly report eats half a morning.

THAT'S WHAT WE REWIRE

WHAT WE BUILD

Three things. Each one takes a job off your team for good.

01

AI automation

Your repeat admin, done without anyone touching it.

- Answers enquiries in minutes
- Types records once, not twice
- Drafts quotes, sends reminders
- Builds and sends the reports

02

Voice agents

A phone line that never misses a call.

- Talks like a person
- Picks up after hours
- Works your old lead lists
- Books and writes the notes

03

Computer vision

Your cameras, doing the counting.

- Counts stock and footfall
- Tracks goods in and out
- Checks items, not samples
- Keeps the record, with times

Built for gyms, cafés, service businesses and growing teams.

RESULTS

Real businesses. Real hours back.

Delta Fitness Club

GYM GROUP · MANY BRANCHES

23→2 hours a week on notes, before and after

7 days of phone calls handed back to sales

"The voice agent worked through our old member list on its own and booked the ones who wanted to come back."

Anthm

CAFÉ

A voice agent takes every reservation call.

"Every enquiry it takes becomes a lead, and the right offers and messages go out to them after."

AIVengers

AI PRODUCT TEAM

A no-code stack for shipping AI products.

"It is the most efficient one we have run."

HOW IT WORKS

Three steps. Only one needs you.

1

Free audit

We look at how your team works and show you where AI fits. No cost, no commitment.

2

We build it

Inside the tools you already use, wired to your rules. Nothing new for your team to learn.

3

It runs

You approve what matters. Everything else runs on its own, with a log of every run.

WHY REWIRE

Your tools
We build where your work already lives.

Your data
Stays in your accounts. Never used to train AI.

Yours to keep
If we stopped tomorrow, it keeps running.
